

IT'S ALL ABOUT THE CALABARZON HOUSEHOLD DATA

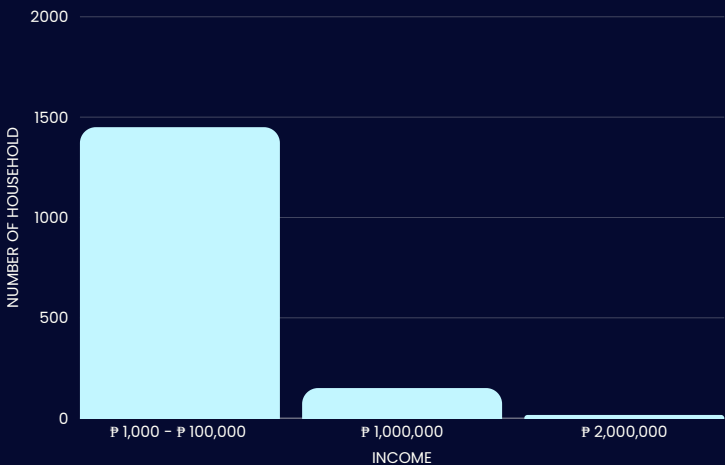

From Income to Expenditure, Every Peso Tells a Story

Distribution of Food Categories (Region IV-A)

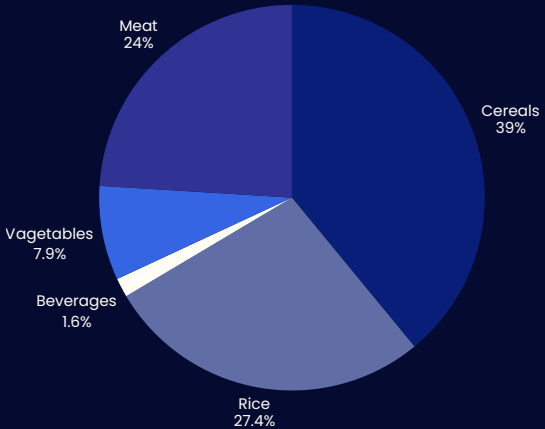

Utilities and transportation form the biggest non-food expenses.
Electricity, water, and transport consume a significant share of household budgets.

Distribution of Household Income in CALABARZON

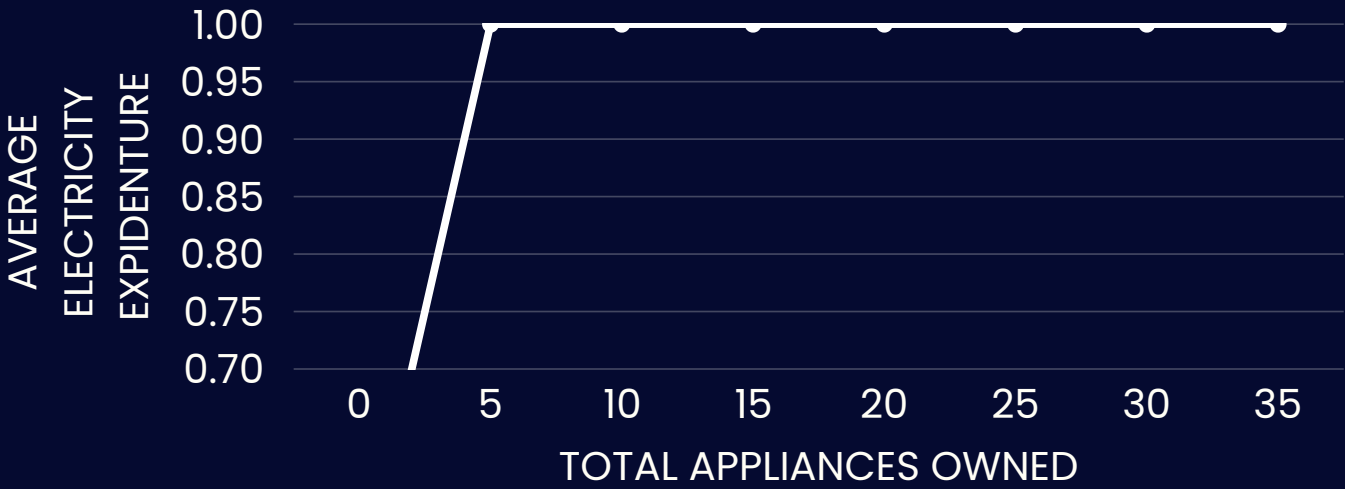

Household income in CALABARZON is unevenly distributed.
The bar graph shows that most households fall within the lower income levels, while a smaller number belong to higher-income groups.

Food Expenditure Breakdown in CALABARZON

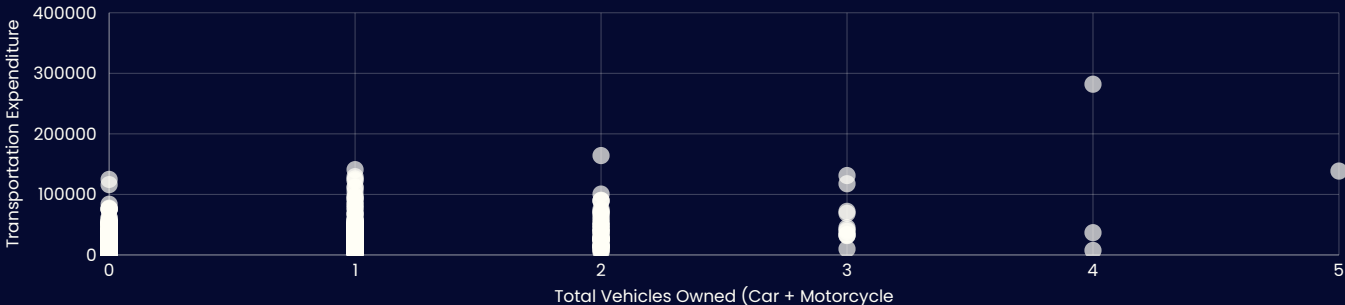

Cereals lead food spending among CALABARZON families, followed by rice and meat.
The pie chart shows cereals as the top food expense, making up 39% of household food budgets. Rice and meat follow closely, highlighting the region's reliance on staple grains and protein-rich meals.

Trend of Electricity Expenditure vs Appliance Count (CALABARZON - IVA)

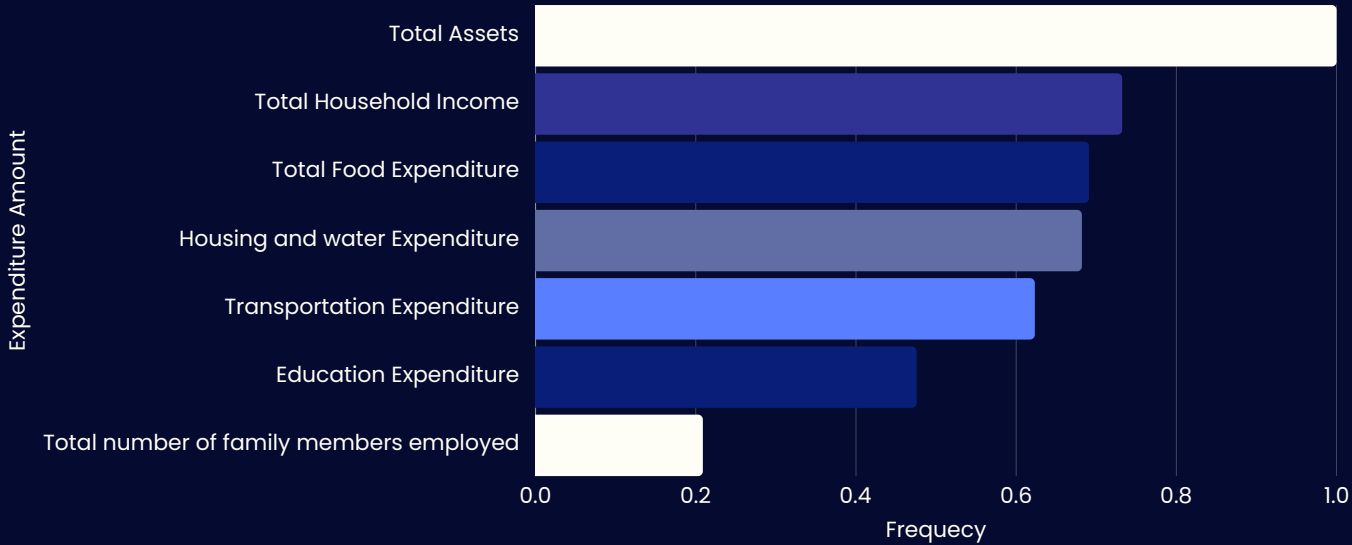

Electricity expenditure in CALABARZON increases sharply when households acquire their first few essential appliances (approximately 1-4 items).

Vehicles Owned vs Transportation Expenditure (CALABARZON - IVA)

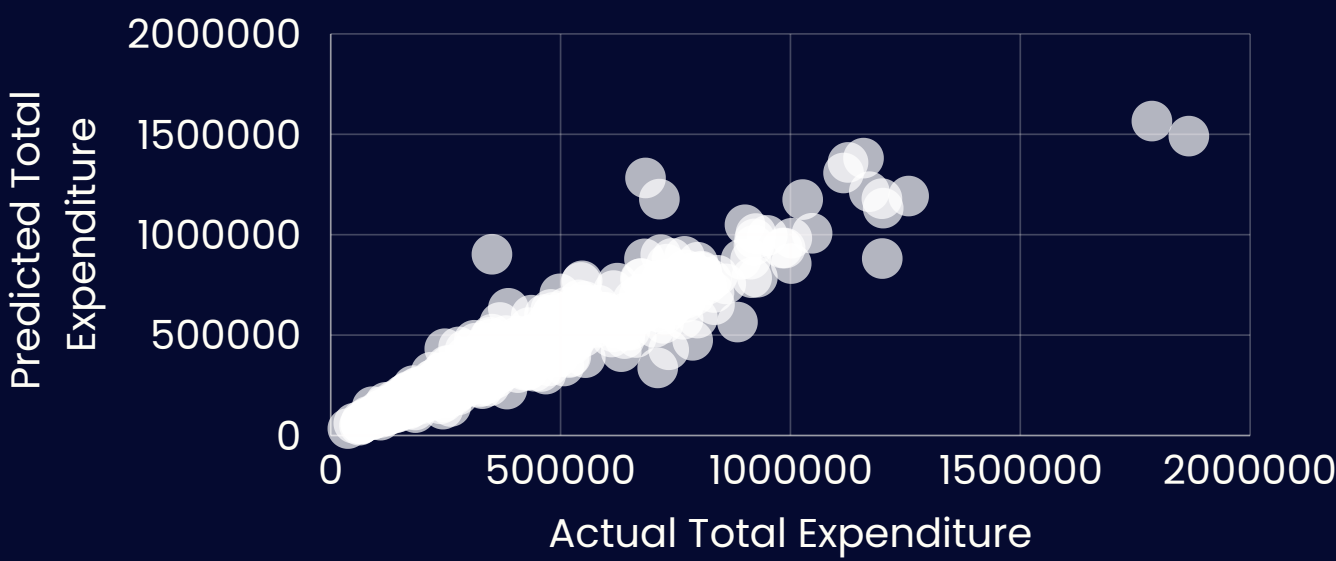

Causes of High Transportation Spending in CALABARZON
Transport spending in CALABARZON increases primarily due to vehicle ownership, especially when households own 2 or more vehicles.

Correlation of Total Assets with Income, Expenditures, and Employment (CALABARZON)

Number of Family Members Employed has small correlation (≈ 0.25) This still matters but is not a major factor. More employed members slightly more assets.

Prediction vs Actual: Total Household Expenditure (CALABARZON)

The model achieves an R^2 of 0.89, which means 89% of the variation in Total Household Expenditure can be explained by income, household characteristics, and asset ownership.
